Salima Tankibayeva

Finance Controlling & Business Analysis | Excel | SQL | Power BI
Milan, Italy · +39 351 653 7241 · salima.tankibayeva@studenti.unimi.it · github.com/sali-ns

Summary

Analyst with an MSc in Data Science for Economics (University of Milan) and hands-on experience in a top-5 Kazakh bank, FinTech, and startups. Skilled in recurring KPI reporting, cohort/attribution analysis and ad-hoc analysis for business stakeholder; automate reporting with SQL, Python and Power BI. Fluent English, good command of Italian.

Technical & Finance Skills

- **Controlling & Reporting:** weekly/monthly performance reporting, KPI monitoring, cohort retention analysis, attribution, P&L / revenue trend analysis, ad-hoc analysis for management.
- **Data:** SQL (PostgreSQL, Greenplum, Oracle), Python (Pandas, NumPy), Streamlit/FastAPI, PowerBI, Git.

Work Experience

Senior Expert, Segmentation & CVM *Sept 2026 – Present*
ForteBank — one of the top-5 banks in Kazakhstan

- Delivered MAU performance reporting for CVM and marketing teams: decomposition into new / reactivated / retained / churned clients, with interpretation and recommendations.
- Built a last-touch channel attribution model (30-day window) showing that over 70% of new clients arrive outside internal CRM communications — redirecting marketing focus and budget.
- Produced an ad-hoc funnel analysis of credit product applications versus actual client activation, demonstrating that application spikes do not translate into active users.

Data Scientist *April 2026 – Present*
Efactoring.kz — Fintech internship

- Automated recurring KPI and performance reporting with Python (Pandas) and Power BI, cutting report preparation from manual work to on-demand delivery for the management team.
- Delivered sales and revenue performance analysis (deal progress, conversion by funnel stage) to support commercial decisions and monitor targets.
- Built and deployed live dashboards (Streamlit + FastAPI) on the company server, replacing static manual reports with real-time business monitoring.

Data Analyst (contract) *June 2026 – Present*
RailHermes LLP — startup

- Analysed vibration sensor time series to detect anomalies, defining thresholds and validating false-alarm rates.
- Built a Tableau dashboard for field testing, giving the team on-site visibility into equipment KPIs.
- Processed high-volume sensor streams and automated recurring quality checks on incoming data.

Data Science Mentor (Internship) *March 2025 – June 2025*
Fondazione Mondo Digitale — Milan

- Created workshops on data analysis (Python, Excel) with international colleagues.

Projects

Credit Card Fraud Detection (XGBoost) 2025 · GitHub

- Developed an XGBoost model with AUPRC 0.8374 on a highly imbalanced dataset (0.17% fraud); tuned `scale_pos_weight` and probability thresholds to protect minority-class recall.
- Conducted PCA analysis, concluding limited separability in reduced dimensions and documenting feature-space complexity for stakeholders.

Education

University of Milan, Italy 2022–2026
MSc: Data Science for Economics

Nazarbayev University, Kazakhstan 2017–2022
BSc: Mathematics — Probability Theory, Linear Algebra, Optimization

Certificates & Languages

- **Certificates:** IBM Applied Data Science, Startup Incubator (Astana Hub)
- **Languages:** English (C1 fluent), Italian (B1, progressing), Russian (native), Kazakh (native).
